

UI/UX Designer & Frontend Specialist

Interface Design - Frontend Development

Angular - JavaScript - HTML - CSS - Figma

Updated Sept 8, 2026

Professional Profile

I'm **Julio Martínez**, with over 15 years of experience designing, building and developing digital interfaces. Throughout my career, I have evolved into a cross-functional profile that combines **design, frontend development and a broader understanding of digital products**.

I feel particularly comfortable working **between design and development**. I speak the same language as designers, UI specialists and developers, which allows me to bridge the gap between teams, understand their needs and turn ideas and designs into real, effective solutions.

Over the years, I have also taken on responsibilities including **project supervision, delivery coordination and mentoring junior profiles and interns**. I particularly enjoy **sharing knowledge and helping others grow professionally**. I like explaining concepts, supporting teammates and passing on my experience so that others can gain confidence and become more independent.

One of my main strengths is **creative problem-solving**. When facing a challenge or an issue, I like to understand its root cause, assess the different options and find effective solutions, always keeping both the user experience and the quality of the final result in mind.

I consider myself **curious, resourceful and collaborative**, someone who enjoys creating, improving and evolving digital products while working closely with a team to achieve a result we can be proud of.

Experience & Education

UI/UX Designer & Frontend Developer

HTML, CSS, JavaScript, Figma...

Prime IT · Avoris Tech

February 2023 – Present

Team lead responsibilities, managing 1–5 people and reporting directly to the Head of Department. Working as a Frontend Developer for Avoris Tech, managing and developing the frontend layer for 29 travel brands and websites, including Viajes Barceló, Ecuador, Halcón Viajes and CATAI. Supervising and mentoring team members and interns, supporting their professional development and helping ensure the quality and consistency of deliverables. Collaborating on the integration of designs and UI mockups into front-end, ensuring accurate implementation of interfaces and a consistent user experience. Participating throughout the development lifecycle, from designing and improving components to their implementation, maintenance and continuous evolution. Troubleshooting and resolving frontend issues, as well as developing campaigns, landing pages and A/B tests. Implementing new features and improvements across CMS and back-office systems. Designing, developing and continuously improving reusable components, providing solutions from both a visual and functional perspective. Working closely with different teams to ensure the quality, consistency and successful delivery of projects.

UX/UI Designer & Frontend Developer

JavaScript, Angular, Bootstrap, WordPress, Drupal...

Legálitas

June 2013 - June 2022 (9 years)

Contributed to the design, development and continuous evolution of Legálitas' digital ecosystem, working across projects of different scales and collaborating with multiple teams and profiles. Designed and developed the Legálitas corporate website, customer private area, CMS, Foundation, ACM and Lab, contributing to new developments as well as ongoing maintenance, updates, restyling and continuous improvements. Designed and developed lead-generation landing pages for major partners including Mutua, Ocaso, Oney and Orange, as well as newsletters, banners and other digital campaign assets. Supervised and contributed to international web projects for CAFAM, Mexico and Colombia, collaborating with different teams and adapting solutions to specific project requirements. Integrated and implemented third-party services, including OneTrust, as well as Core Web Vitals improvements focused on performance and user experience. Designed and developed the Legálitas Private Area and several travel websites for Globalia using Angular, JavaScript and Bootstrap. Developed full-stack pages and features using WordPress and Drupal, including projects such as Fundación Legálitas. Trained and mentored interns, sharing knowledge and best practices while helping them integrate into the team and develop greater autonomy in their work. Contributed throughout the full development lifecycle, from analysis and interface design to implementation, maintenance and continuous improvement. Collaborated with different teams and profiles to solve problems, improve processes and ensure the quality and consistency of digital interfaces.

Frontend Layout Designer

Tormo Interactive

January 2010 - June 2013 (3 years & 5 months)

UI/UX design and frontend layout for custom client sites (Mamma Mia, Tagliatella). Handled client communication to build tailored web solutions in HTML5, CSS, and JavaScript using Bootstrap, jQuery UI, and WordPress. Collaboration with .NET/PHP backend teams.

Modality

Hybrid

On-site

Remote

Languages

Spanish (Native), English

Frontend Programmer & Designer

NIELSEN & PARTNERS

January 2009 - January 2010 (1 year)

Web design and layout creation for enterprise clients like Carrefour. Developed landing pages, newsletters, promotional banners, and form validations using JavaScript/jQuery.

Web Designer & Layout Developer

Yo quiero uno de esos.com

June 2008 - June 2009 (1 year)

Campaign design and maintenance for a PHP Magento e-commerce store. Newsletters, animated banners, and Tortoise repository management.

Web Designer & Layout Developer

La Moderna Marketing Agency

January 2008 - June 2009 (1 year & 5 months)

Web design for clients including Telefónica, Vivir el vino, and BMW. Lead generation landing pages, interactive forms, and rich visual campaigns.

Web Designer & Layout Developer

Welcomelearning

June 2007 - June 2008 (1 year)

E-learning course creation for enterprise clients (Endesa, Repsol) using HTML, JavaScript, Moodle, SWF animations, and ActionScript.

Objective

My goal is to continue **creating, improving and evolving high-quality digital products**, bringing my experience in design, frontend development and user experience to every project I work on.

I particularly enjoy projects where I can **pay attention to detail, solve problems and evolve existing solutions**, always looking for the right balance between a strong user experience, a polished visual result and a solid technical implementation.

I want to continue learning and growing professionally by **exploring new technologies, libraries, frameworks and tools**, including AI, to find more efficient ways of working and bring greater value to the projects I contribute to.

I am looking for an environment where I can **bring my experience from day one, continue learning and share knowledge with the team**, actively contributing to the evolution of the product and helping turn needs and ideas into useful, high-quality digital experiences.
